

IP 2908 is a phthalate free static cling film. This Environmentally friendly and skin tolerant static cling film has been formulated to adhere to surfaces without the need of an adhesive and is reusable. This material has been specifically designed for digital printing on large-format inkjets and is suitable for printing with eco solvent and solvent inks as well as UV-cured inks.

**IP 2908**

The Environmentally friendly and skin tolerant static cling film IP 2908 is a printable inkjet PVC film, that sticks / clings to smooth gloss surfaces such as glass, smooth plastic and glossy metal surfaces. This material sticks to these surfaces without any adhesive and can be removed without leaving any residue behind. The environment friendly IP 2908 is manufactured to EU directive 2005/84/CE standards. IP static cling film is ideal for a variety of graphics, craft and decorative applications such as signs, decals, window graphics, door covering, protective covering and much more. We do not recommend to contour cut the graphics before 72 hours after printing. Never apply the printed graphic in a way that the ink is in direct contact with the window. This can cause transfer of ink onto the glass. Laminate: N/A

Specifications	
DESCRIPTION	Static cling film
COLOUR	Clear
THICKNESS	165µ
WEIGHT	N/A
ADHESIVE	N/A
RELEASE PAPER	Paper
TEMPERATURE RANGE	- 30°C up to + 70°C
DURABILITY (UNPRINTED)	N/A
FLAME RETARDANCY	N/A
SHELF LIFE	3 months, 20°C / 50% humidity
RECOMMENDATION	For optimum quality, please ensure that the media feed adjustment has been completed for this material
